Investment Information

Investment Objective & Strategy

The trust seeks the highest level of income consistent with the preservation of capital over time by investing primarily in marketable debt securities. Under normal circumstances, the trust will invest at least 80% of total assets in income-producing securities, which may include, but are not limited to, U.S. government and agency obligations, mortgage- and asset-backed securities, corporate bonds, foreign securities, collateralized mortgage obligations (CMOs), Treasury Inflation Protected Securities (TIPS), and others, including on occasion, equities. The trust focuses primarily on investment grade income securities.

Issuer	T. Rowe Price Trust Company

Category Description: Intermediate-Term Bond

Intermediate-term bond portfolios invest primarily in corporate and other investment-grade U.S. fixed-income issues and typically have durations of 3.5 to 6.0 years. These portfolios are less sensitive to interest rates, and therefore less volatile, than portfolios that have longer durations. Morningstar calculates monthly breakpoints using the effective duration of the Morningstar Core Bond Index in determining duration assignment. Intermediate-term is defined as 75% to 125% of the three-year average effective duration of the MCBI.
